PROFILE

Frontend engineer with more than three and a half years of production experience across corporate sites, product platforms and enterprise applications. Works across the full path to release: interface, API integration, build pipelines, security headers, VAPT remediation and web-server configuration. Uses AI tools to accelerate scaffolding and implementation while owning architecture, testing, security and final verification.

EXPERIENCE

Associate Trainee, working as Full Stack Developer · Finstein Advizory LLP Mar 2023 – Present

- Built and maintained production websites and Angular applications, from interface work through UAT and deployment.
- Designed an Angular 21 SSR product site where 138 JSON files drive the site's routes, with SEO checks that block the production build.
- Built a 19-language React site with browser prerendering and a build gate that stops blank pages from shipping.
- Delivered fixes across 10 VAPT rounds on 6 websites; all 6 key security headers are live on 4 production sites.
- Reached 96 or higher on mobile Lighthouse performance on 3 production sites, with 100 for accessibility, best practices and SEO (November 2026).
- Contributed features to enterprise systems in finance, manufacturing, lending and education, and wrote automated tests for banking applications in an existing WebdriverIO and Appium framework.

SELECTED PROJECTS

ERP Product Platform Angular 21 SSR, TypeScript, Node tooling

Content-driven architecture with a bespoke SEO linter in the build, and UAT and production server parity across Nginx and Apache.

MES Product Site Angular 21, three.js, GSAP, Lenis

59-component marketing site with interactive 3D scenes, scroll choreography and a rate-limited Express and MySQL contact service.

Privacy Advisory Site React 19, Vite, TypeScript, Puppeteer

Prerendered 19-language site with locale parity enforced by script and IndexNow in the release path.

Compliance Platform Site Next.js 16, React 19, Playwright

59-page site ported to a static Next.js export, verified with a real-browser QA harness.

Jarvis Assistant (personal) Python, FastAPI, Claude, Gemini, Ollama

Local-first AI assistant with swappable model backends, cross-session memory, voice control and cross-platform installers.

SKILLS

Frontend: Angular, React, Next.js, TypeScript, JavaScript, RxJS, Signals, HTML, SCSS, Tailwind, three.js, GSAP
Platform: NestJS, Node.js, Express, TypeORM, MySQL, PostgreSQL, REST, SSR
Quality and delivery: Playwright, Lighthouse CI, Puppeteer, WebdriverIO, Appium, GitLab CI, GitHub Actions, Docker, Nginx, Apache, Linux

Security: VAPT remediation, CSP, HSTS, security headers, reCAPTCHA v3
AI tooling: Claude Code, agent workflows, Anthropic API, Gemini, Ollama

EDUCATION AND LANGUAGES

B.Tech, Information Technology · Park College of Engineering and Technology, Coimbatore 2017 – 2021

Core Java course, QSpiders Chennai · Languages: English, Tamil
